Anonymous Doubt Resolution

Verified resolution for every doubt.

A MECHANISM TO ENSURE THAT THE ENTIRE TEAM REMAINS ALIGNED ON ALL ASPECTS OF RDR OPERATIONS.

Problem Statement

We operate in a space which is very dynamic. Things change fast, and our operations impact customer experience directly. While we as a team make a bulk real time changes, we have to ensure that our leadership principle - Success and Scale Bring Broad Responsibility is well taken care of. One of the challenge which we have to mitigate responsibly is to keep the entire team on the same page at all times in a dynamic space. Many a times quality of information passed from the leadership gets diluted, or at times looses it’s original form till the time it affects the customer. Vice-versa is also True. To ensure customer obsession, every one in the team must be dynamically on the same page at all times, and at the same time, we as a team, we can Invent and Simplify as well, we have created a slack based work flow named Query- which also resonates with our leadership principle of being Frugal in approach.

Introduction

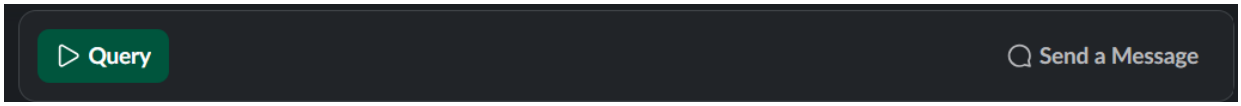
The **Query** Workflow is a Slack-based system that enables auditors across all RDR pipelines to raise SOP-related, process-related, and tool-related doubts & suggestions anonymously. To get started, visit the team's Slack channel **rdr-team-all**, and simply click the Query button placed in the chat panel to raise your query. Every submission is assigned a unique Ticket ID. Leadership, then caters to anecdotes, suggestion and doubt. No individual's identity is disclosed at any stage, or, to any party, throughout the resolution process. All past resolutions are accessible to the entire team for reference. This way we achieve a common understanding of our standard operating procedure which at times get very dynamic. Additionally, upon resolution of a query, the auditor receives the answer directly in their Slack DM as well, allowing them to refer back to it at any point they may require.

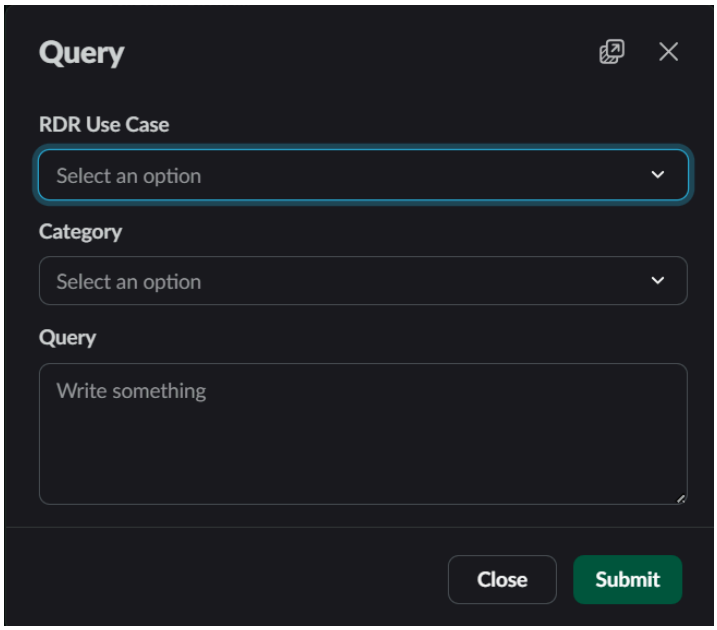
Step-by-Step Process

FOR AUDITORS

Step 1

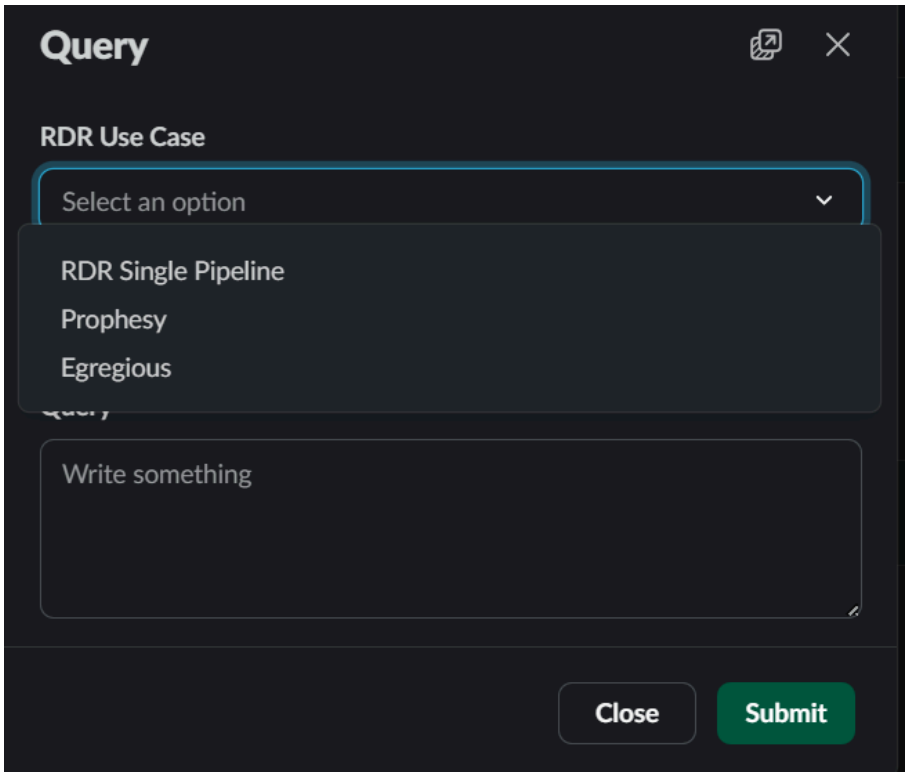
Navigate to the **rdr-team-all** Slack channel. Click the green Query button at the bottom of the channel. A submission form will open within Slack.





Step 2

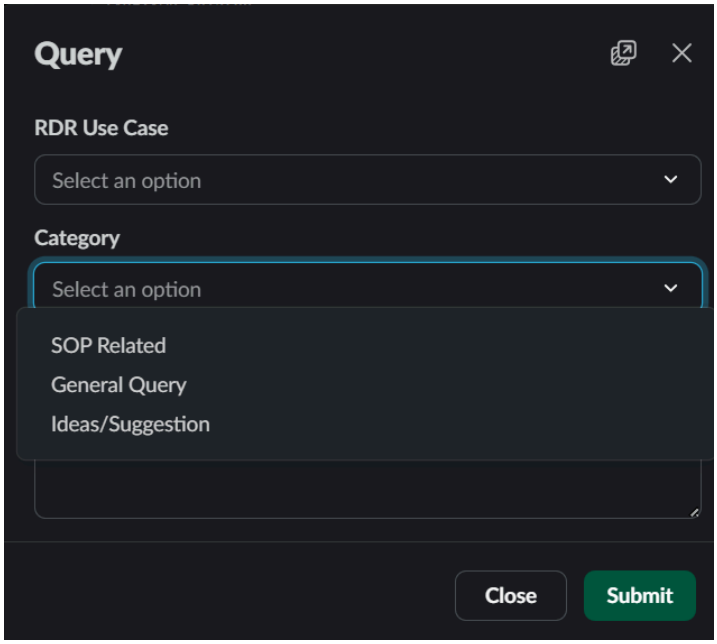
From the dropdown, choose the appropriate use case your query relates to.



Step 3

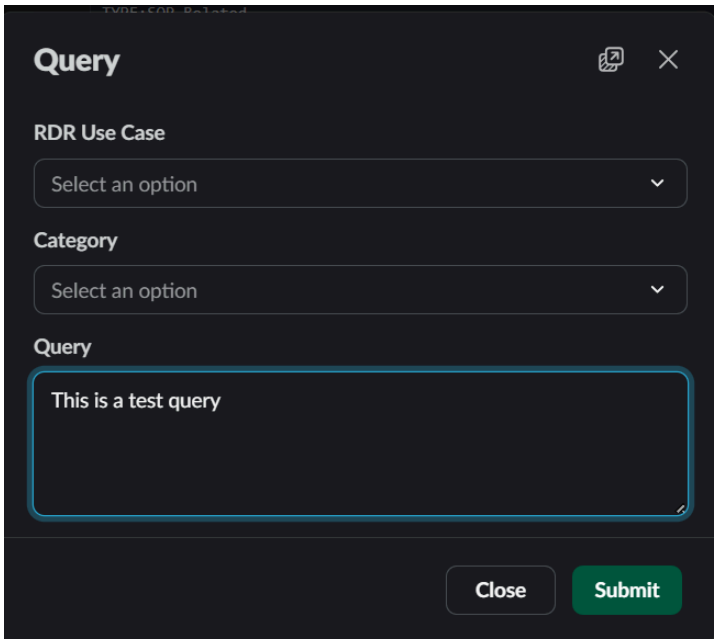
Choose the option that best describes the nature of your query.

Select **SOP Related** for doubts and discussion about our Standard Operating Procedure.
Select **General Query** for doubts and discussion related to Operations processes, tools, etc.
Select **Ideas/Suggestion** for suggesting and discussing any new idea that may be.



Step 4

In the Query text field, clearly describe your related doubt or suggestion. Try to be as specific as possible to help the manager provide an accurate and useful response.
Note: Your identity will not be shared with anyone at any level of discussion.

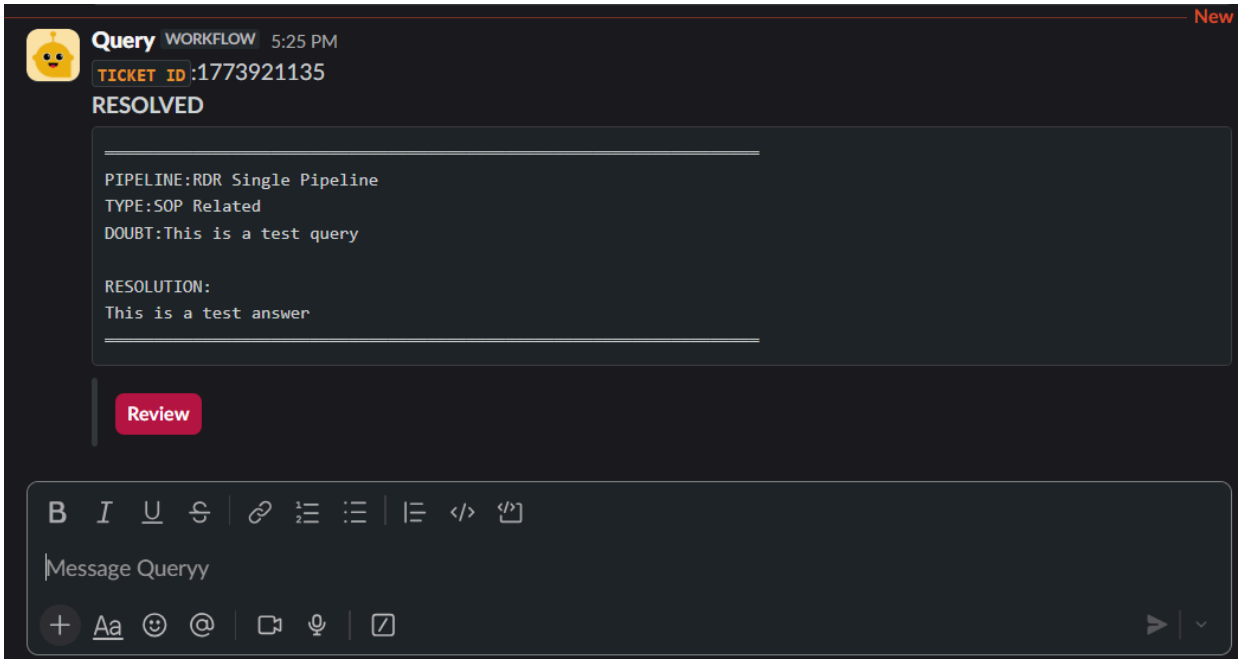


Step 5

Once we click the Submit button, against raised query, a unique **Ticket ID** will be automatically generated and posted in the group.
Note: Simultaneously, the query with ticket number as it's identity, will be posted in a leaders group as well from where leaders will reply.

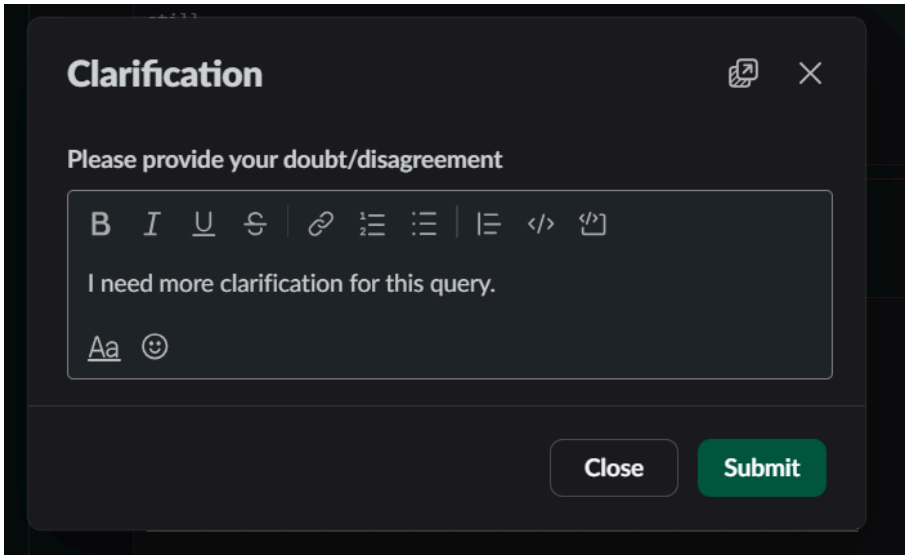
Step 6

Once the leadership replies, we will receive the resolution along with original doubt and ticket number - directly in our Slack DM. Also, the same will be posted in rdr-team-all channel and Ticket will be marked as resolved.

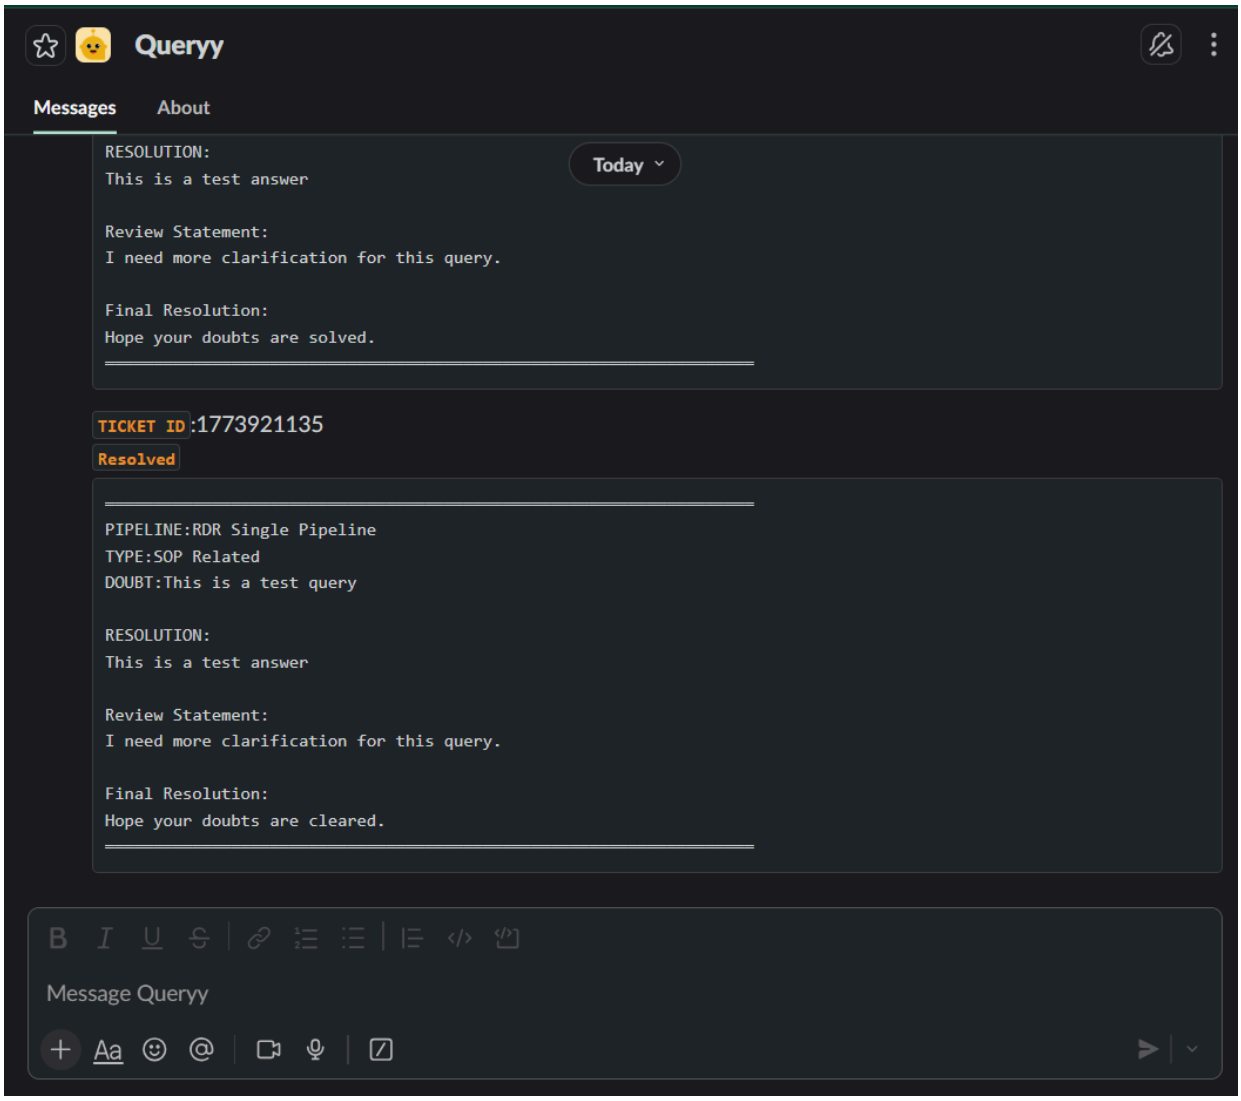


Step 7

If the resolution does not fully address your doubt, you can click the red **Review** button present along with the resolution you receive in your DM.



After you submit your clarification doubt statement, it will be sent for leadership review and individual shall receive the clarification in their personal DM once the leadership replies.



Important points to note:

- Auditor identity is never revealed at any point in the workflow — submissions are fully anonymous.
- This workflow is not for live cases; it is solely for process doubts, SOP questions, and suggestions.
